# Technical Data Sheet

## Purisan™ Calcium Hypochlorite Granules & Tablets

### Description

Quick dissolving product suitable for cleaning and disinfection of swimming pool water.

### Characteristics

Physical Appearance: Solid white granules or tablets

Odour: Slight chlorine odour

### Instructions For Use

Initial Treatment Add 1200gms for every 50m$^3$ pool water. After 2 hours adjust the pH to a value between 7.2 – 7.6
Maintenance Treatment: With the pH value between 7.2 – 7.6 dose 120 – 170gms per 50m$^3$ pool water weekly.

Tablets should be dosed ONLY to the skimmers or via a dispenser. Granules can be added directly to the pool water. If the pool is small pre-dissolve the granules and broadcast around the pool. Do not allow bathing while dosing or for 2 – 4 hours afterwards and providing free-chlorine level is in the range 0.5 – 1.5ppm (below 3ppm MAX).

### Comments

Water pH must be maintained in the range 7.2 – 7.6 and this should be checked at both ends of the pool daily.
The free chlorine level should be
maintained in the range 0.5 – 1.5 ppm (parts per million).

Recommended dosages are approximate and depend on water hardness, bather load and the weather.
