# Technical Data Sheet

## Purisan™ Multifunction Tablet

### Description

A five action solid compound (Disinfectant, pH Corrector, Flocculent, De-scaler & Algaecide) especially formulated so that just one application eliminates bacteria, viruses and micro-organisms, prevents the development of algae and keeps the water clean and crystal clear. Compatible with any filtration system.

High Concentration of slow dissolving chlorine  
Destroys Algae and prevents development  
Improves filtration by flocculation

### Characteristics

Physical Appearance: Solid white tablets with blue speckles (200 gms).

Odour: Slight chlorine odour

### Instructions For Use

Between 800 and 1000 gms for every 50m<sup>3</sup> (50,000 litres or 11,000 Imp Gals) swimming pool water will maintain correct chlorination for approximately one week (normal bather load). Place tablets in surface skimmer or dispenser.

### Comments

Water pH must be maintained in the range 7.2 – 7.6 and this should be checked at both ends of the pool daily.

The free chlorine level should be maintained in the range 0.5 – 1.5 ppm (parts per million).

Recommended dosages are approximate and depend on water hardness, bather load and the weather.
